" The tips come from my 35+ years of photography experience, from my passions of landscape, macro, collage and infrared photography to portraits, weddings, product shots and the odd bit of fashion. They also draw from my varied other interests and activities: helping people overcome creative blocks, teaching photography, art and computers at all levels of adult education, a passion for science, philosophy, spirituality and history, and much more. I find it constantly amazing that interests in one area will often yield insights in a completely different field."
