

Thinking About Management: A Reflective Practice Approach

Content

Thinking About Management: A Reflective Practice Approach by David Currie.

...

This book invites the reader to explore the more puzzling aspects of those processes called 'management'. It provides a focused collection of readings to support and encourage wider consideration of alternative ways of thinking about management and its effectiveness in contemporary organisations. Key features of this text include:

- * a selection of contributions which derive from historically grounded and politically aware considerations, examining alternative approaches, and drawing on a wider source of perspectives than those currently dominating management literature
- * an exploration of the uncertainties and apparent contradictions encountered in management action, grounded in the reflective practices of the contributors, employing examples and experiences from a wide range of organizations
- * ideas fundamental to understanding the complexities of management which will extend students' own ways of thinking
- * an informed contextual approach to the study of management, grouping together themes and ideas which shed light upon the contested arenas of management action.

By placing emphasis on the development of improved critical abilities in management practice, this book will be an invaluable text for all management studies and MBA students.
